

CAMP ASKS VIRGINIA TO TRY OUT NEW GAME

Feasibility of Proposed Features in Football May Be Tested at Charlottesville—Camp to Personally Direct Experiments.

[Special to The Times-Dispatch.]
CHARLOTTESVILLE, VA., January 5.—Anent the subject of football reform, Dr. W. A. Lambeth, of the University of Virginia, a member of the football rules committee, has just received a letter from Walter Camp, the noted football authority, in which he suggests that experiments be made by the Virginia team to test the feasibility of the proposed new features in the great gridiron game. Dr. Lambeth will telegraph Mr. Camp if the condition of the athletic field should justify his coming to Charlottesville to conduct the proposed experiments. When the plan was suggested to Captain Yancey, of the Virginia varsity eleven, he heartily approved, and declared that the team would willingly help in the test demonstration.

Mr. Camp is the father of football in America, and is probably more in touch with football conditions than any man in the country. He proposes to make the experiment in question by way of finding some plan to lay before the rules committee, which will meet in New York in the course of the next two weeks.

It seems particularly appropriate that the University of Virginia should have a share in determining the probable revision of the game, and it may be that the experiments made on Lambeth field will establish the future status of American football.

Relative to Mr. Camp's probable visit and his suggestions for a revision of football rules, Dr. Lambeth to-day made the following statement:

"Walter Camp has written that he would like to get the aid of the Virginia first and second teams to try out some proposed changes in the football rules. If the weather continues open, it is very likely that Mr. Camp will visit the university in the next few days. If he does so, it is to be desired that the teams and coaches will co-operate with Mr. Camp in the experiments for the use of the rules committee."

"Mr. Camp is of the opinion that mass play has increased during the year because of the necessity for bringing the secondary men back to defend against forward passes and on-side kicks. He proposes to narrow the line of scrimmage and increase the distance to be gained in order to offset this necessity."

The results of the test games and its immediate influence upon the changes to be devised by the rules committee will be awaited with peculiar interest all over the country. Dr. Lambeth declares that he believes there will be radical changes in the present rules of the game.

Declaration Against "Syndicate Baseball"

CINCINNATI, O., January 5.—A straight declaration against "syndicate baseball" in the report of August Herrmann, chairman of the National Baseball Commission, was the feature of the annual meeting of that body to-day. Several decisions were handed down after adjournment. The initial appearance of Thomas J. Lynch, president of the National League, as a member of the commission, was made the excuse for turning the meeting into something of a festive occasion. To-night he was the guest of honor at a dinner given by Chairman Herrmann and President Johnson, of the American League.

William Murray's statement of his claim against the Philadelphia National League Club was not made public. He asserted that he has a contract calling for his services as manager until after the season of 1911, but that the new management of the

Despite the absence of a large audience, owing to the inclement weather, Wright Kramer delivered another entertaining lecture at the Academy. "Our Own Hawaii" was the subject. "Our Own Hawaii" was the subject. The new possession of Uncle Sam was delightfully described, and the vivid and unique pictures which illustrated the talk were of much interest. Mr. Kramer was as charming in delivery as in subject, and did not allow the value of the lecture to be lessened by the usual indifference manifested by others on dull nights.

The pictures of the Burning Lake, showing clearly for the first time the actual flowing and cooling of lava and the moulding of lava forms, was of especial interest. The photograph of lava in eruptive action at night was the first ever shown here, and was most striking and vivid.

PRESS NOTES FROM THE THEATRES.

Honolulu Students.
Something unique in the shape of musical entertainment will be provided for a large audience at the Academy this evening, when the Honolulu Students, the famous Hawaiian group of vocal and instrumental artists, will appear under the auspices of the Radcliffe Bureau.

There are six full-blooded Hawaiians in the organization, including one woman, and in their own way they have succeeded in producing one of the most popular and delightful programs now being presented on the lecture circuits in this country. Enough of American and classical music will be inserted to prevent monotony, but the feature of the course will be the weird and beautiful melodies of Hawaii sung to the students. The singers will appear in Pacific Island costume, and the scenery will be typical of Hawaii and its people.

Fox-Hunting Country Wanted

The undersigned is interested in locating a pack of hounds and possible purchasing of a country place in Middle or Southern Virginia.

Not necessary for the country to be on or near a railroad; in fact, such a position is undesirable as no country will be entertained where Page woven fence or barb wire have already been placed to take the place of other fencing.

A country with either Virginia snake, post and rail or stone walls is especially desirable. The country must be a farming place, with a large river or by plenty of runs, and naturally and strongly supplied with red foxes, and flat and rolling enough so that it can be properly ridden over.

An area of forty to fifty square miles is necessary, among a community of sports-loving, law-abiding people, who would welcome a hunt where true sport and the killing of red fox is the desire.

The establishment of a hunt in a country brings an expenditure of from \$5,000 to \$10,000 a year, and a demand for country places, etc., which is always desirable.

The hunt will be managed in a law-abiding, businesslike manner, all damage promptly paid and the respect of the land owners merited and desired.

Any one knowing of such a country, or having property for sale in a community so constituted, or a body of fox-hunters so placed, that they would welcome a hunt such as the above, will communicate with
